DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-7, 10 and 11, drawn to a biochip reader comprising at least one of a rotation plate and a barrier/interfering filter, classified in class 356, subclass 318.
- II. Claims 8 and 9, drawn to a biochip reader comprising one of a mask and a mirror to prevent mixing excitation light into the detector side, classified in class 356, subclass 317.
- III. Claims 12-15, drawn to biochip reader comprising a light source to generate excitation light composed of a part of strong light intensity and another part of weak light intensity, classified in class 356, subclass 317.
- IV. Claim 16, drawn to a biochip reader comprising a detector in which output values are logarithmic to input values, classified in class 356, subclass 317.

The inventions are distinct, each from the other because of the following reasons:

The biochip reader of Group I does not require the particulars of the biochip readers of Groups II, III and IV for patentability, as evidenced by independent claims 1, 3, 7, 10 and 11. The biochip reader of Group II does not require the particulars of the biochip readers of Groups I, III and IV for patentability, as evidenced by independent claims 8 and 9. The biochip reader of Group III does not require the particulars of the biochip readers of Groups I, II and IV for patentability, as evidenced by independent claim 12. The biochip reader of Group IV does not

Art Unit: 2877

require the particulars of the biochip readers of Groups I, II and III for patentability, as evidenced by independent claims 16.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).

Fax/Telephone Numbers

Papers related to this application may be submitted to Technology Center 2800 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The fax numbers for Technology Center 2800 are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.

If applicant wishes to send a fax containing a Proposed Amendment for discussion during either a personal interview or a telephone interview then the fax should:

- 1) Contain either the statement "**DRAFT**" or "**PROPOSED AMENDMENT**" on the Fax Cover Sheet; and
- 2) Should be unsigned by the attorney or agent.

This will ensure that the amendment will not be entered into the application and will be forwarded to the examiner as quickly as possible.
